This Wave I grouping file is for use with the Obesity and Neighborhood Environment (ONE) data. The Wave I data in the ONE contextual files were created using these Wave I respondent locations. The grouping variable in this file is based on the Census FIPS codes and is 12 characters in length. The first 2 characters describe the unique state group, the first 5 characters identify the county, the first 11 characters are the tract, and the entire variable is the unique block group.

NOTE: These are pseudo codes and are not linkable to outside data sources.
